

Bellevue Avenue resurfacing from University Boulevard to Interstate 25 set to begin in May

What is happening on the project?

On May 4, the Colorado Department of Transportation and Brannan Sand and Gravel will begin work on the Bellevue Avenue (Colorado Highway 88) Overlay Project from University Boulevard to Interstate (I) 25. Work on this project will improve driving conditions and safety along this 3-mile stretch of Bellevue Avenue, including pavement resurfacing, concrete sidewalk and curb ramp improvements, and roadway re-striping. The resurfacing will be completed through mill and overlay, which involves removing a layer of existing asphalt and putting new asphalt on top of the milled surface.

Beginning in May, crews will complete concrete work on the curb ramps and sidewalks. Once concrete work is completed, which is anticipated by the end of June, crews will begin resurfacing Bellevue Avenue. Motorists can expect daytime lane closures during concrete work and nighttime lane closures during resurfacing work. Crews will work from University Boulevard westbound to I-25.

Where is the project located?

Work will take place on Bellevue Avenue between mile point (MP) 11.50 and MP 14.71.

What are the expected travel impacts?

- Motorists should expect single and auxiliary lane closures during work hours.
- Daytime lane closure hours for concrete work.
- Nighttime lane closure hours for resurfacing work.
- There will be no speed reductions or oversized /overweight restrictions.

When are crews working?

- Daytime work hours are Monday through Friday from 8:00 a.m. to 5:00 p.m.
- Nighttime work hours are Sunday night through Friday morning from 6:00 p.m. to 6:00 a.m. and possible weekend work Friday night through Sunday morning from 7:00 p.m. to 10:00 a.m.

When should the project be complete?

Work is expected to end in August 2020, weather dependent.
